

## “MY DOG IS HOW OLD?”

Canine aging is much more rapid during their first two and a half years. Around 3 years of age, the ratio defers from different breeds.

- Small sized dogs ~ 1 calendar year to 4 dog years
- Medium sized dogs ~ 1 calendar year to 4½ dog years
- Large sized dogs ~ 1 calendar year to 5½ dog years
- Giant breeds ~ 1 calendar year to 7½ dog years

The relative age of different-sized dogs varies through life. Given the different life expectancies of small to giant breeds, two dogs of exactly the same age may in fact be at very different stages in their lives.

<b>Dog Years</b>	<b>Small 3 – 20 lbs</b>	<b>Medium 21 – 55 lbs</b>	<b>Large 56 – 88 lbs</b>	<b>Giant 89 lbs +</b>
1 – 6 months	10	10	10	10
